WORK EXPERIENCE

Software Engineer Trainee

March 2026 – Current

SYMB Technology

India

- Building full-stack applications using React and Django, focusing on clean code and modular design.
- Collaborating with senior developers on code structure, Git workflows, and real-world development practices

Engineering intern

Aug 2025 – Feb 2026

PayU

Bangalore, India

- Designed and automated DPD (Days Past Due) file generation pipelines for DCB Bank, generating cron-based batch files containing 2.7K user records per file, ensuring timely reporting and partner compliance.
- Developed asynchronous loan closure flows using Celery task queues, improving reliability and handling background job execution safely at scale.
- Participated in on-call rotations under a structured SLA framework (P0–P3), including exposure to P0 production incidents requiring resolution within 2–4 hours where active revenue loss was occurring.
- Developed encrypted APIs for IIFL integrations to securely exchange financial data with external systems.

SDE intern

Feb 2025 – Aug 2025

Surya FinTech

Bangalore, India

- Gained hands-on experience in React.js, SQL and django by working on real-world software development tasks.
- Contributed to the internal React component library used across multiple product teams, building reusable, configurable UI components to standardize financial workflows.

Full stack development Intern

Feb 2024 – Aug 2024

Brandsmite

Bangalore, India

- Developed full-stack applications using Node.js, Express.js and React.js implementing MongoDB schemas for authentication workflow.
- Collaborated with a five-member developers team to work on authentication and authorization API.

PROJECTS

DocuQuery AI | *LangChain, LangGraph, Qdrant, Fast API*

March 2026 – May 2026

- Built a full-stack GenAI system using LangGraph with dynamic routing across chat, RAG, and tool-based workflows, enabling stateful interactions and contextual responses.
- Designed a modular tool pipeline (web search → LLM synthesis → PDF generation) and developed a React + FastAPI app with JWT auth, session memory, and PostgreSQL persistence.
- Implemented embedding-based semantic search using HuggingFace sentence transformers and Qdrant as the vector store, enabling fast and accurate document retrieval across large corpora.

Poloroid | *React Js, Tailwind CSS, Django, SQL*

Jan 2026 – Feb 2026

- Built a full-stack social platform with JWT-based authentication, REST APIs, and relational database design for user, post, and interaction models
- Integrated AI-based content moderation using a pretrained NLP model to detect and block abusive captions.

PROBLEM SOLVING & EXTRACURRICULAR

- Solved 370+ DSA problems on LeetCode (leetcode.com/u/ashish74624/), covering arrays, graphs, trees, DP, and greedy.
- Led 5-member team at NMIT Hacks 2024, building a full-stack image processing application (Pixel Pry).

EDUCATION

RNS Institute of Technology

Bangalore, India

Bachelor of Engineering in Information Science and Engineering (CGPA : 8.63)

Dec 2021 - July 2025

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, TypeScript

Frameworks & Databases: Django, FastAPI, React, Next.js, Express.js, PostgreSQL, MySQL, MongoDB

AI / LLM: LangChain, LangGraph, FAISS, Qdrant, RAG pipelines, HuggingFace Embeddings, Groq LLM API

Tools & Technologies: Git, Vercel, Postman, AWS, Docker, Celery
